Full-stack developer and AI product builder with a background in architectural engineering and 5+ years of operations leadership. Builds production AI tools — including a deployed chatbot and a SaaS immigration tracker. Combines systems thinking with shipping speed to deliver real-world products that generate revenue.

EXPERIENCE	Full Stack Developer ELIKA BEAUTY Burnaby JUN. 2025 – Present - Re-platformed salon operations onto a custom full-stack booking system (React, Node.js, REST API) — end-to-end ownership from architecture to deployment on Vercel and Render - Reduced booking errors by ~90% through a scheduling engine with conflict detection and automated time-slot validation - Enabled 24/7 customer engagement by integrating the Dew AI chatbot, eliminating the need for additional front-desk staff - Collaborated directly with the business owner to gather requirements, iterate on features, and manage the full product lifecycle
	Frontend Developer Community of Guardians Ontario (Remote) JAN. 2026 – Present - Implemented UI features from a Figma design system in a React, TypeScript, and Material UI codebase, reducing component duplication across the app - Built and maintained a reusable component library used across the application - Collaborated with a distributed team using TanStack Query, Git workflows, and Agile sprint cycles
	Customer Operations & Team Lead Lordco Auto Parts Vancouver NOV. 2019 – MAR. 2025 - Managed daily operations for a high-volume team handling ~100 customer interactions per day - Onboarded and mentored new team members, maintaining accountability in a fast-paced environment
	Navly — Canadian Immigration Tracker (SaaS) www.navly.ca/ APR. 2026 - Built and launched a freemium SaaS that helps immigrants track their Canadian PR pathway — CRS score estimator, stage-based checklist, and live IRCC draw notifications - Sole founder — owned product design, full-stack build (Next.js, Supabase), pricing, and go-to-market end to end
	DEW AI Chatbot — Embeddable AI Front-Desk Tool dew DEC. 2025 - Built and deployed an embeddable AI assistant (Next.js, FastAPI, Google Gemini API) now active on ELIKA Beauty's website — automating customer inquiries around the clock - Designed a prompt engineering system using injected knowledge files to deliver context-aware, business-specific responses without hallucination
KEY PROJECTS	Forge — Mobile Application Team Project SEP. 2025 Led an 8-person cross-functional team through full Agile delivery: sprint planning, standups, backlog grooming, and retrospectives
	TECHNICAL SKILLS Languages: JavaScript, TypeScript, Python, C# Frontend: React, Next.js, Material UI, Tailwind CSS, ShadCN, Backend: Node.js, Express, FastAPI, ASP.NET, REST APIs Database: MongoDB, PostgreSQL, Supabase, SQL, Prisma, Redis AI / ML: Groq, Google Gemini, ElevenLabs, prompt engineering, LLM integration Tools: Git, GitHub Actions (CI/CD), Vercel, Netlify, Render, Docker, n8n, Figma, Agile/Scrum
EDUCATION	Full Stack Web Development Diploma BCIT APR. 2026
	B.Sc. in Architectural Engineering Azad University- Iran JAN. 2019
VOLUNTEER	BCIT Women In Computing (WiC) Social Media Director SEP. 2025 – APR. 2026
	Web Summit Vancouver Analytics & Data Collection MAY 2026
